

Technical Lead – Software Development

Make your mark

Are you looking for a role where your technical expertise can make an impact? If so, as Technical Lead you will be responsible for overseeing technical architecture and engineering tasks as well as pioneering best practice for one of our Agile team products. You will be responsible for the effective delivery of our third party and internally managed IT infrastructure and work closely with Product Owners to convert business requirements and influence high-quality coding standards.

In this role, you will have the opportunity to work within a diverse and phenomenal culture that thrives on its agile and transformational environment. Your proven facilitation and strong coaching skills, together with experience leading and managing the delivery of system & software development projects will help take your career and GetCapital to the next level.

How you will make a difference

- Work with Product Owners & manage transition from analysis through to design & delivery across the team
- Identify risks, manage issues and drive stakeholders to deliver on time and to quality standards
- Suggest frameworks, technical standards, coding and software practices
- Solution design, document and lead end-to-end architecture of new initiatives
- Mentor, guide and coach developers within the Agile team
- Lead development and lifetime maintenance of software products
- Manage continuous improvement process within the software products' lifecycle
- Oversee and improve coding standards
- Test and maintain software products to ensure strong functionality and optimisation

Skills that set you apart

- Proven experience leading and managing the delivery of system/software development projects
- Experience in a variety of software development approaches including Agile and Waterfall
- Experience in both architecture and implementation-level software design
- Experience in requirements capture, analysis techniques and process improvement approaches
- Excellent personal organisation and ability to prioritise and carry out multiple tasks
- Able to influence and drive projects to meet key milestones and overcome challenges
- A desire to remain technically capable and an expert in current technologies
